

Squibb Garden

The Squibb has been maintained for Community and Visitors use since 2007/8 by various volunteer teams. They have enthusiastically given their time and energy to maintaining this village asset often using their own tools and equipment.

- 1) The garden now needs refreshing which involves replanting the cleared areas of weed, dead shrub plant and trees.
- 2) As well as laying down a good base and improving its surround, a new storage shed/facility is needed.
- 3) Additionally, the paved areas require remedial repair works which includes relifting wobbly and damaged slabs, relaying and then repointing the cleaned joints.

If the nomination is successful any resulting proceeds will be held and administered by the Friends of St Mary's for exclusive use in the Squibb Garden.
